Memo

To: Herbert Begay
From: David Thompson
Date: 09-08-03
Subject: Low Mountain 60 North Arc Sites

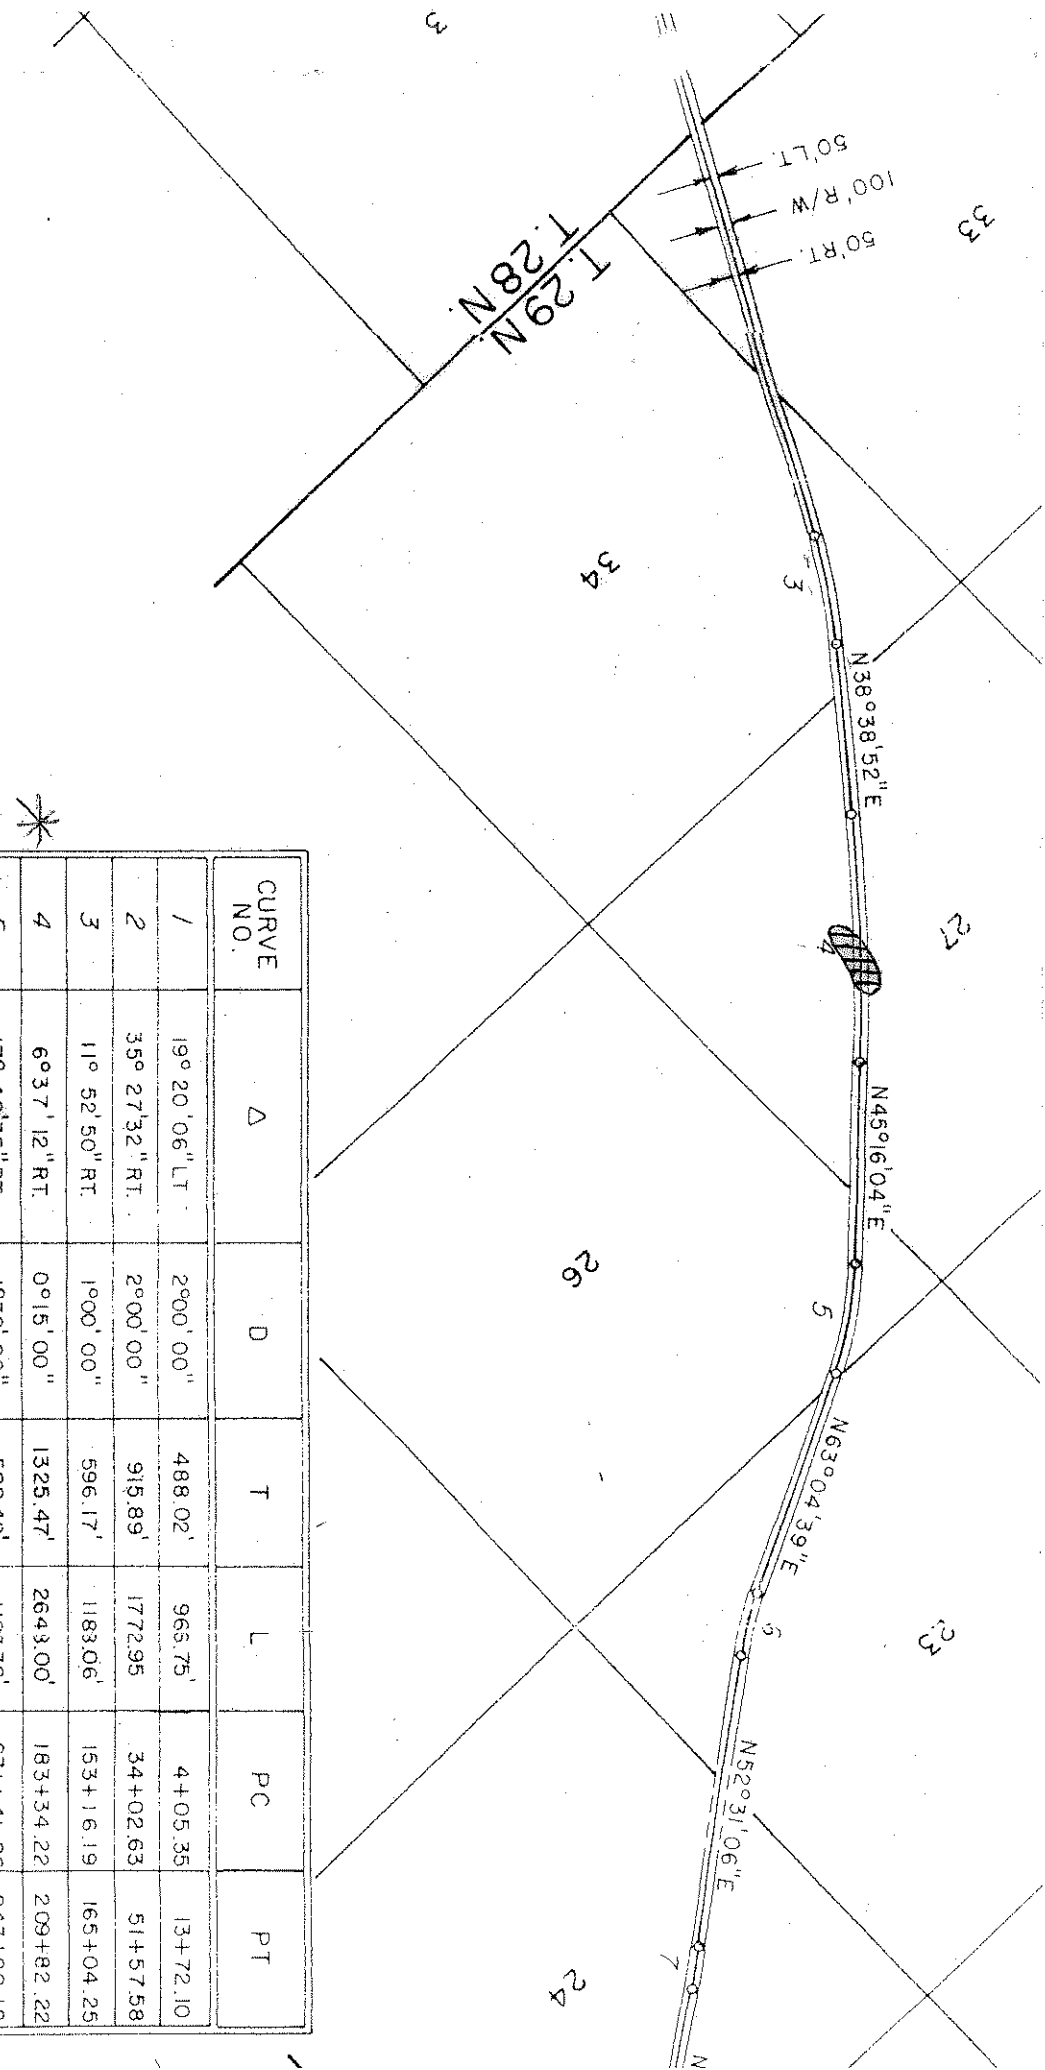

I, David Thompson met with the Tribal Archeologist lanelle at the beginning of the route 60 north and she showed me the important areas as follows.

1. The New proposal alignment at the beginning of state highway 264 to the first P.I. point has ruins at the site.(She recommends moving the B.O.P. toward east about 150.00 feet.)
2. Between station 186+30 to 189+70 has plenty of evidences showing a site. She suggests to Move the alignment southwest about 100.00 feet estimates. (Alignment change)
3. A proposal borrow pit six at station 572+00 has been reject due to some finding at the area.
4. A proposal borrow pit seven at station 647+00 has a site on the Northeast corner of the pit, the pit needs to be moved 50.00 feet southwest direction.
5. Lanelle said she will have all her paper work in sometime in the 3rd week of September 2003,on the low mountain arc informing and findings
